

# BoldPath Men's Ministry Survey

## An essential tool to traverse the terrain.

"The BoldPath Men's Survey is a remarkable way to draw men into thinking about and contributing their ideas for men's ministry. It helped the leadership create the right priorities and simulated interest, awareness and anticipation among the men of our church."

David Michael,  
Associate Pastor,  
Bethlehem Baptist Church,  
Minneapolis, MN

The BoldPath Men's Survey is a quick and effective way to uncover the needs of the men in your church and will help you develop the right strategies to move them boldly forward in their journey.

Consisting of approximately twenty questions, the BoldPath Men's Survey gathers information on the following topics:

- Personal profiling information
- Degree of current participation in men's ministries and areas of interest
- Perceptions of the current men's ministries programs and offerings
- Suggestions for improvement
- Personal needs and self-evaluations

The survey is conducted online, launched from an email distributed to the men in your church. They open the email and click on the link that takes them to the online survey. In less than 10 minutes, they're done. The result: improved response rate and better information about their needs.

When the survey collection period is complete, we'll send you a graphical report of the collective set of responses, along with summary observations to help you digest the findings. Like others that have used the BoldPath Men's Survey, you'll find that the process increases excitement and involvement in your men's ministry offerings.
